

Founder, Leader, Developer

Tiago Rodrigues

As all founders, I've done it all: coding, designing, setting strategies, managing projects, and so on. With a solid background in engineering and a keen eye for design, I'm all about creating great products and solving real problems. I've built my own agency in my 20s, driven by a clear vision and a love for building things. I excel at envisioning the big picture, leading teams, and articulating ideas to align everyone toward common goals.

and more actually.

My Experience, Explained

Founder, Developer, Web Product Manager at Developh

- Successfully established and spearheaded Developh from its inception, transforming it into a prominent player in the web development industry.
- Developed Developh's exclusive focus on web development, a strategic choice stemming from the belief that the internet holds the key to future business success.
- Specialized in dynamic websites and web applications tailored to clients' unique specifications, employing cutting-edge technologies and innovative design.

STEAM Teacher at Happy Code Portugal

- Pioneered English-language STEAM education in private schools, fostering a multicultural learning environment and enhancing students' global competencies.
- Orchestrated STEM bootcamps through hands-on projects.

Front-end Developer at Alma D'Sal

- Developed and maintained Alma D'Sal website with emphasis on responsiveness, user-friendliness, and quality.
- Designed and implemented customized features to enhance user experience and ensure SEO compatibility.

Computer Technician at Chip7 Algés

- Offered hardware and software assistance for computers and electronic devices, effectively diagnosing and resolving issues.
- Proficiently installed, configured, and maintained operating systems, applications, and peripherals.

Network Technician at Doutor Finanças

- Played a pivotal role in establishing a new company network infrastructure, covering LAN and VoIP communication systems.
- Successfully installed racks, switches, routers, and meticulously validated cabling for adherence to quality and security standards.
